📌 Overview

This is a **personal portfolio website** built using HTML. It showcases basic information about me, my interests, and my academic journey as a web developer.

The goal of this project is to demonstrate foundational web development skills, including:

- Structuring multi-page websites
- Creating navigation systems
- Displaying structured data (lists & tables)

🧱 Project Structure

```
/project-folder
├── index.html      # Home page
├── About.html      # About page
├── Contact.html    # Contact page
```

🏠 Home Page

Features:

- Introduction with name and role
- Academic status (2nd year student)
- Navigation menu
- Images (local + external)

👤 About Page

Features:

- List of hobbies
- Academic modules displayed in a table

📞 Contact Page

Features:

- Navigation menu
- Placeholder for future contact details

🧭 Navigation System

Each page includes a navigation bar linking to:

- Home
- About
- Contact

This ensures a consistent and user-friendly browsing experience.

🛠️ Technologies Used

- HTML5

⚠️ Known Issues

- Incorrect `<html>` tag spelling in `index.html`
- Invalid `<p1>` tag used instead of `<p>`
- No CSS styling applied
- Contact page lacks content

🚀 Future Improvements

- ✅ Add CSS styling (modern UI/UX)
- ✅ Make the site responsive (mobile-friendly)
- ✅ Add contact details (email, LinkedIn, GitHub)
- ✅ Fix semantic HTML issues
- ⏳ Add JavaScript interactivity
- ⏳ Build a projects/portfolio section

🖥️ How to Run Locally

1. Download or clone this repository
2. Open `index.html` in your browser
3. Navigate using the menu links

🌍 Deployment Options

You can deploy this website using:

- GitHub Pages
- Netlify
- Vercel
